Break time meaning in turkish

Your browser does not support audio. Turkish translation More Turkish words for lunch break öğle tatili noun lunch hour See also English See also Turkish arası prefix between, inter-öğlen adjective, noun noon, noon, meridian Nearby Translations How many times have you found yourself in a state of self-disgust or panic, trying to find a match for the word or phrase you use in your native language just to understand that there is simply no satisfactory equivalent of a foreign language, so you just stand there trying to explain what an embarrassing, disturbed grin on your face means? It happened to us the very best. Naturally, it is natural that some words and expressions certainly do not have a corresponding translation into another language - not full of both syntactic and semantic meaning. Each language stands out from a different culture and is therefore related to its people. When you do not communicate with your language, you also interact with a culture that speaks the language, and you feel how they live, think and express their emotions. Learning a new language is difficult, and speaking in Turkish really is a challenge for Anglophones. Yes, for some it is easier than others, but getting used to the set of alien grammar rules and word structures on loan words and creative, envelope-pushing idiosyncmes and proverbs is not an easy feat. But what makes The Turks even more attractive to learn is right there. There are many unique Turkish words that do not look equivalent to English, but here are 10 beautiful, meaningful and some completely strange choices: Let's start with everyday phrases. Kolay gelsin Although mostly literally translated as Can be easy for you, its closest similarities would probably keep up a good job, Can be easy (breezy) or more power in your elbow. The Turks say this to those who work, whether it's a job that requires physical power or a lot of mental concentration. You usually used to say this at the beginning when someone starts working on a particular task. It acknowledges that the work in question can be difficult for a person engaged in it and expresses genuine hope and desire for success for its recipient. Buyurun Most of the time, you will hear this bright as a buyrun. Come this way, please, behold, there are only a few ways in which this could be translated. The Turkish people use the word when they give something to someone, giving the person the right to the road or even to the dinner table, asking guests to take their seats. It's a polite word with a slightly formal tone. Ellerinize sağliĭk If you want to say kolay gelsin someone prepares dinner and cooking, ellerinize sağliĭk is what you want to say after a meal thank the host / cook. Literally translated, it is health in hand and expresses gratitude to the person produced for the fact that he takes the time to make something tasty with his own hands, you would say compliments to the chef in English, in Turkish you would say ellerinize sağliĭk. In addition to food-related cases, you could also use this phrase to see someone create a beautiful work of art in your garden – a painting, a poem or even a floral arrangement. It's a good job! is a better english translation, but it is still not properly recorded. One important point to look out for. When you are with friends or people that you are closer and on the basis of a name, ellerine sağliĭk would be more appropriate than saying ellerinize, because the latter is more formal and shows a certain distance between the two things in the conversation. Geçmiş olsun In the simplest sense it is sincere good desire. It is used especially after someone has fallen ill, and is often forced to get well. If we translate it word-for-word it would mean it could pass, with it referring to what is ailing you at the moment. In addition to health-related issues, you can also tell geçmiş olsun if a friend suffered an accident, but survived with small scratches or cuts or stole something. Now it's time for more charming words that cemented their presence in many literary masterpieces. Yakamoz It was the first word that immediately popped into my mind when the Daily Sabah copy editor asked on Instagram what our favorite Turkish words were. Yakamoz is that beautiful phenomenon that occurs at night, when the glowing light of the moon reflects the water. It also describes the blue, fluorescent glow created by bioluminescent plankton in water. Most Turkish people's first meeting with the word is either a poem or songs from Rafet El Roman, İbrahim Tatlıses or Ahmet Kaya. After all, she has a romantic appeal to him. You'll probably see a lot of seaside restaurants named after the word. The word (actually of Greek origin) is so charming and perfect for some that it even won first place in a contest in Berlin titled The World's Most Beautiful ABC (Das schönste ABC der Welt) of the 2,500 unique contenders. Hüzün Hüzün is more than a simple word for Turks. It's a complicated feeling; he stands out with a sense of melancholy, inexplicable sadness, blackened by romanticism, he expresses loss or inadequacy. Not surprisingly, in many works by authors or filmmakers, it is used as a theme or status. Perhaps the most widely known example of its use is in Orhan Pamuk's autobiography Hüzün. He claims that the word borrowed from Arabic is simply untranslated, so he has kept it as being in English in his writings. Gönül Turks have a lot of heart and love-related words in their arsenal, and this is just one of them. Of the three Turkish words for the heart – the other two are yürek and kalp – gönül is not the real, physical heart of man/animal, which pumps blood, but it is metaphorical. The emotions and love we feel come from gönül. The thing that breaks when one hurts you gönül. This is also a thing you have to work hard to win something (see gönülünü kazanmak). If you are a good person doing good deeds, you can also earn a place / be anchored in people's hearts (See: gönüllerde that kurmak) This word is also a favorite of songwriters; just look at the songs Ebru Gündeş or Zerrin Özer. THE SHORTEST AND LONGEST TURKISH WORDS O HE, SHE AND HER. The Turkish language has one letter, a sexless word for everyone and that is o. While this can cause a lot of confusion about who did what, it is perfect for mysterious novels. There is a loud lack of a third-party singular pronoun, english has long debated the creation and widespread use of gender-neutral pronouns, and in 2019. Merriam-Webster announced they were word of the year – although this in itself also causes confusion (is it plural or singular?). Muvaffakiyetsizleştiricileştiriveremeyebileceklerimizdenmişsinizcesine It sounds like a whole lot gobbledygook, doesn't it? It's normal if you think you have an aneurysm when you try to pronounce this 70-letter behemoth word. Derived from the Arabic noun muvaffakiyet (which means success in English), this word means as if you are one of those for whom we can not easily get to the creator of unsuccessful. In fact, the story was even fanciful just to use this word. Českoslovakyalılaştırıramadıklarımızdanmışsınız It was a runner until that mammoth word above I will not repeat. This word was born when Czechoslovakia divorced and became the Czech Republic (or Czech Republic since 2016) and the Slovak Republic. Meaning you are reportedly one of those that we couldn't make czechoslovakia, the word is a real tongue twister. Due to the fact that there is an agglutination language and grammar sleds, it is possible to create words that look like they are forever going in Turkish. Although technically only one word, when all these frontlinks are joined together, they form a faster sentence.
